

MUTHUPRIYA SHANKARAN

AI Engineer

Solna, Stockholm, Sweden | +46 764 399 098 | smuthupriyait@gmail.com | linkedin.com/in/muthupriya-sa215b4110 | github.com/smuthupriyait
Eligible to work in Sweden

PROFILE

AI-focused engineer with an M.Sc. in Artificial Intelligence from Stockholm University and professional experience across software, data and API-driven systems. Hands-on with Python, SQL, REST APIs, data validation and machine-learning applications, with a strong focus on building solutions that are testable, reliable and ready for real-world use. Currently developing a personal RAG project involving document retrieval, LLM integration, prompt design and evaluation, building on a solid foundation in data quality, testing and system integration.

CORE SKILLS

AI & LLM

RAG · LLM application development · prompt design · document retrieval · vector search · AI evaluation · machine learning

Python & Data

Python · Pandas · NumPy · SQL · PostgreSQL · data processing · data validation · ETL · GCP BigQuery

APIs & Backend

REST APIs · API integration & validation · Flask · FastAPI · Postman · ReadyAPI

Testing, Evaluation & Reliability

Automated testing · regression testing · integration testing · Selenium · Playwright · pytest · TestNG · JMeter

Engineering Tools

GCP · Git · Jenkins · Azure DevOps · Jira · Jupyter · VS Code

AI & DATA PROJECTS

RAG Assistant — In Progress *Python, RAG, LLM, Vector Search, FastAPI*

Developing a personal RAG application that retrieves relevant information from documents and uses an LLM to generate answers based on the retrieved content. Exploring document chunking, vector retrieval, prompt design and evaluation.

Banking Fraud Detection & Test Automation github.com/smuthupriyait/Test-Automation-banking-ML

Built a Playwright/pytest UI and API automation project around a Flask-based machine-learning fraud-detection API, validating transaction data, API behaviour and model predictions end to end.

Data Mining & Big Data Projects github.com/smuthupriyait/Data-mining_Projects · github.com/smuthupriyait/Big-data--projects

Python and Jupyter projects covering data preprocessing, feature engineering, machine-learning model training and evaluation, together with distributed data-processing exercises completed during the M.Sc. in Artificial Intelligence.

PROFESSIONAL EXPERIENCE

Solution Developer Intern — TalentRiver

Stockholm, Sweden | Aug 2025 – Jan 2026

- Developed automated data-validation solutions for a data-driven recruitment platform and integrations with external ATS systems.
- Used SQL/PostgreSQL to compare data across systems and identify inconsistencies, missing data and synchronisation issues.
- Developed API-level validation for REST services and worked with developers to improve test coverage and system reliability.

Data Management Intern — World Sports Group

Stockholm, Sweden | Mar 2024 – Aug 2024

- Validated data across multiple platforms, identifying mismatches, missing fields and data-quality issues.
- Tested rule-based content classification and verified data integrity across downstream workflows.
- Designed functional and regression scenarios for data and content pipelines during system changes.

Data Analyst Intern — Odyssey

Stockholm, Sweden | Sep 2022 – Jan 2023

- Automated survey and data-collection workflows using Python, reducing manual processing.
- Queried and validated datasets in GCP BigQuery using SQL and supported data-quality checks for downstream reporting.
- Supported ETL and data-migration activities by reconciling source and target data.

Technical Tester — Toteme (via Techlove)

Stockholm, Sweden | May 2022 – Jun 2022

- Performed front-end, back-end and API testing using Postman and Azure DevOps, working with developers to identify and resolve defects.

Support & QA Engineer — Test99

Remote | Aug 2016 – Jun 2018

- Tested web and desktop applications through functional, exploratory and regression testing.
- Automated repetitive test scenarios using Selenium WebDriver and TestNG.

Middleware Engineer — Tata Consultancy Services, client: Deutsche Bank

Bangalore, India | Jun 2015 – Mar 2016

- Worked on web SSO authentication and 2FA API integration in a financial-services environment.
- Developed and maintained automated build and deployment jobs using Jenkins and Maven.
- Used SQL for backend validation and investigated database and integration issues.

Software Engineer — SME Software

Salem, India | Jun 2013 – Mar 2015

- Developed internal application components using Core Java and SQL.
- Built Selenium WebDriver/TestNG automation and performed JMeter testing to validate application functionality and performance.

EDUCATION

M.Sc. in Interaction Design for Artificial Realities — Stockholm University, Sweden (2026 – Present)

120 credits, 2-year programme

M.Sc. in Artificial Intelligence — Stockholm University, Sweden (2021 – 2022)

Thesis: Acceptance of socially assistive robots among elderly users

B.Tech in Information Technology — India (2009 – 2013)

CERTIFICATIONS

Google Cloud Professional Data Engineer

ISTQB Certified Tester – Foundation Level (CTFL)

Oracle Certified Associate (OCA)

Swedish — Grund 3 completed; currently studying Grundläggande 4

LANGUAGES

English — Professional proficiency

Swedish — Intermediate

Tamil — Native
